The Marin County Flood Control & Water Conservation District will be conducting an evaluation of portions of Corte Madera Creek’s concrete channel on May 6 and 7, 2019. The scheduled work entails using small machinery to collect core samples from four locations inside Corte Madera Creek’s concrete channel.

This effort is related to the Corte Madera Creek Flood Risk Management Project, and samples will be used to help inform future design options. Detailed information on the overall project can be found on the project webpage at: www.marinwatersheds.org/resources/projects/corte-madera-creek-flood-risk-management-project.

Work will be conducted on Monday and Tuesday, May 6 and 7, from 7:00AM to 4:00PM. Some minor localized noise could be experienced intermittently by residents in the vicinity. The locations where work will be conducted can be seen on the map below. No equipment or work will be on the bike path.

If you have any questions or concerns, please contact Hugh Davis, P.E., Associate Civic Engineer, at hdavis@marincounty.org or 415-473-4232.
